TITLE : DEVELOPER APPLYING METHOD AND
 DEVICE THEREFOR

ABSTRACT : PURPOSE: To obtain a developer applying method and device therefor capable of improving development accuracy and productivity and simplifying developing equipment.

CONSTITUTION: The surface of a glass plate 5 rotating horizontally is spin coated with a developer by spraying this developer onto this glass plate by a first nozzle 11. The spin coated surface is washed by a washing liquid sprayed from a second nozzle 12. The developer applying device is provided with a nozzle section 4 which arranges the first nozzle 11 and the second nozzle 12 double on each other and integrating these nozzles to one so that the developer and the washing liquid are alternately sprayed without individually moving the respective nozzles 11, 12.
